

Australian Broadcasting Facilities

Client Coates Hire
Project Broadcasting facilities, Australian Open
Location Melbourne, Victoria
Contract 12 weeks

Overview

MBS was appointed by Coates Hire as the subcontractor for the design and manufacture of the two-storey Tennis Australia broadcasting facility. The program and delivery schedule was challenging. The project had to be finished for the start of the broadcast of the 2015 Australian Open. MBS revised the different production lines to dramatically improve the speed of construction.

Solution

The output was outstanding, and MBS delivered 3,060m² of buildings in 85 modules within the short program timeline. The building had to meet specific structural requirements so it could be re-used each year for the following five years. Specific internal requirements were also necessary in light of the broadcasting equipment.

Benefits

- Meeting a tight deadline while providing quality buildings
- Providing innovative structural design
