

Northshore Christian Grammar School

Client

Swan Christian Education

Location

Alkimos, Western Australia

Timeline

5 months (start of construction to occupancy)

Services

Full Turnkey Solution

Value

\$740,000

Overview

Following a surge of new enrolments in mid-2020, Northshore Christian Grammar School (NCGS) urgently required additional classrooms to cater for more than 90 new students in the impending school year. Fleetwood was engaged to design, manufacture, transport and install a new classroom block to swiftly meet the schools increasing needs.

Solution

A key requirement from the client was that the building was to be in keeping with the school's existing, architectural award-winning facilities. Fleetwood's in-house design team ensured seamless integration of the new building with the existing structures.

The completed building is comprised of five precast concrete chassis modules, measuring 4.8 metres wide by 15 metres long. Construction of the buildings was completed offsite in late 2020, and later installed at the school campus in just a few weeks!

Benefits

Fleetwood's dedicated and professional team quickly delivered all drawings and the associated estimating to allow for the building handover and practical completion in early 2021, as required by the client.

The 344 square metre education block consists of four new 69m² classrooms separated by an internal central corridor, creating spacious and inclusive learning environments that facilitate student collaboration and wellbeing. NCGS is now equipped for the continued growth of its student population into the future.
