

# DFAT Australian Embassy Rabat, Morocco

<b>Client</b>	CC Pines (DFAT)
<b>Project</b>	Australian Embassy
<b>Timeline</b>	6 months
<b>Value</b>	\$3.5 million

## Overview

Fleetwood Australia partnered with CC Pines to design and manufacture a new Australian Embassy that was entirely built in Smithfield, NSW, before shipping internationally for installation on site in Rabat, Morocco.

## Solution

The new state-of-the-art Australian Embassy Building is 450m<sup>2</sup> and consists of a reception area, offices, interview rooms, amenities, sick bay, breakout rooms, data room and kitchen facilities.

Other features included the highest quality G2 ballistic rating to the exterior of the building, CSC certification for shipping, ducted air conditioning, DFAT security and acoustic requirements as well as a high-level office fit out.

## Benefits

- Working closely with the client, consultants and significant number of external stakeholders during the design and manufacturing process to ensure compliance with strict DFAT security specifications
- Providing a DfMA volumetric modular design to meet the client's exact requirements
- Completing a full four week commissioning process of the building in Fleetwood's NSW factory before shipping internationally.
